Vanquish Fat Reduction System, A Revolutionary New Cosmetic Treatment

(Tucson, AZ, February 27, 2015) Maloney Plastic Surgery & Skincare is now proudly offering the new Vanquish Fat Reduction system. Get your tummy and love handles ready for swimsuit season. Vanquish Fat Reduction is a safe and revolutionary way to remove unwanted “belly” fat without surgery and with little to no recovery time. Vanquish is painless, there is no anesthesia required, no bandages, or post-procedure pain and it is now available at the offices of Maloney Plastic Surgery. Join us for our free “*Vanquish – Melt Your Fat Away*” lecture on Thursday, March 5th from 5:00-7:00 pm.

“Vanquish is a safe, effective and affordable alternative for both women and men who do not want invasive surgical procedures,” said Doctor Christopher Maloney, Jr. “There is no ‘down time’ with Vanquish, you can get it done on your lunch hour and return to work and most patients see results after only a few visits.”

Vanquish is the first **Aesthetic RF** (radio frequency) technology to emit an electromagnetic field over a large treatment area, which allows for the safe delivery of beneficial RF energy over the mid-section of the body without the applicator panels making contact with the skin. Vanquish utilizes real-time **tissue impedance** tuning circuitry, like a radio tuner, to match the characteristics of RF energy with the particular response of the desired deep tissue layer.

Vanquish is a safe, non-invasive, and non-surgical solution for body treatments. It requires no direct contact and it is comfortable, affordable, and has short, focused treatment sessions. The majority of people will only require four 30-45 minute treatments seven to ten days apart. Vanquish is recommended for anyone over the age of 21 who desires to improve problem areas around the mid-section where exercise and diets have failed.
